osom[®] COVID-19 Antigen Home Test

For an Emergency Use Authorization (EUA) only

The OSOM COVID-19 Antigen Home Test is intended for the qualitative detection of SARS-CoV-2 nucleocapsid protein antigen in anterior nasal (nares) swab samples. This test does NOT determine if you had COVID-19 in the past or if you have immunity.

Determining a negative result requires multiple tests. You may need to purchase additional tests to perform serial (repeat) testing. This test is more likely to give you a false negative result when you have COVID-19 than a lab-based molecular test.

If you test positive for COVID-19 please contact your doctor/primary care physician or your local health authority immediately and adhere to the local guidelines regarding self-isolation.

For home testing (ages 2 and up).
